Teslin Tlingit Council

Thanks to MLA Stacey Hassard for doing the Land Lottery draw. Jonathan Sidney shakes the MLA's hand after having his name drawn. Congrats to all the citizens who were selected to own a lot in the Sawmill Subdivision. Best of luck building your dream homes.

## Message from Nha Shade Heni

### Masayiyati

As we welcome the summer season, TTC is moving forward on important initiatives. The Biomass Project is underway with the clearing of land for the construction of buildings to hold the systems. TTC is, once again, on the cutting edge of innovation. This is an exciting project. We have local contractors and employees working on the project.

For the past few months, TTC has been conducting public consultations. These consultations are crucial for the Government to run efficiently. Citizen involvement is important. We need your input in order to make decisions on policies and procedures.

The Healing Strategy is another very important initiative that TTC is pursuing with the help of two facilitators. We have held workshops in the past year and the third portion includes another workshop called "Positive Choices, Positive Voices". Facilitated by Andy Nieman on June 22nd to 24th at the long House. The Healing

### TTC General Council

July 11- 13, 2017

Brooks Brook

9am – 5pm daily

Contact Executive Services for more information: 867-390-2532 ext:305

Strategy will help us approach healing as a Community in a positive and consistent way. We invite and encourage all people to attend. "Together, we are creating a safe and healthy community."

The Lands & Resources department recently held a Land Lottery for the Sawmill Road Subdivision. Congratulations to the winners! We will continue to address the housing shortage as effectively and efficiently as possible.

We are also preparing for the General Assembly scheduled from July 11th to 13th at Brooks Brook. A shuttle service from Teslin will be available for Citizens who want to attend the meetings. The Shuttle schedule will be posted on our website, facebook page and around Teslin.

On July 27th – 30th, 2017 is the 5th bi-annual Haa Kusteeyi at the Heritage Center. A time to celebrate who we are and where we come from. This is an amazing opportunity for our youth to learn our Tlingit history, culture and traditions. This event is hosted by the three inland Tlingit First Nations, Taku River, Carcross/Tagish and Teslin Tlingit. We look forward to welcoming our Tlingit brothers and sisters from Alaska and the Yukon and also showcasing our rich culture to the public. This event draws hundreds of visitors therefore volunteers are need! Please contact the Heritage Center if you want to volunteer or if you need more information. At this year's Haa Kusteeyi, we will be passing the torch to the Carcross/Tagish First Nation to host in Carcross the next

Celebration in 2 years which means that Teslin will not be hosting it for a few years. Make sure you come and enjoy the festivities!

Summer presents an opportunity to celebrate, build and rejuvenate from winter. Summer is also a time where we witness the achievements of our students. Congratulations to all the graduates! We are very proud of you all, and all the best in your future endeavors.

### 2017 Graduates:

Gage Park	Jack Grant
Cole Dewhurst	Olivia Cox
Daniel Hager	Tanner Bahm
Arden Bolton	Shania Hogan
Jacob Jackson	Ethan Lavallee
Destiny Taylor	Samera Carlick
Ryan Jules	

Thank you to Citizens, TTC staff for their valued contributions and support. I'm proud to be your Chief and will continue to work for our People.

I hope to see you at the General Assembly and at Haa Kusteeyi

Gunalchish  
Achêno - Richard

# Biomass Project Update

TTC in coordination with the Yukon College had residents of Teslin learn about the installation, maintenance, harvesting practices, including choosing trees for biomass, limbing, bucking options and the storage of chips. Course covered the processing of chips from standing tree to chips in a hopper, and included a discussion on central processing versus distributed processing. There are many elements that the group had to cover in order to run the Biomass heating systems efficiently.

People may have noticed, clearing and removing of trees around Teslin. These cleared areas are for the foundation and units that will be installed. There are four locations for the biomass buildings producing biomass: 1) Is the two buildings being built out at the YRT yard, to collect and dry the chips that feed the biomass boilers; 2) Is the boiler building at the back of the Main Administration Building; it will have two boilers in it; and the 3rd & 4th) are buildings located near the Lands office; they will each have four boilers in them.

There will be ten buildings being heated by the biomass system:

- 1) Teslin School
- 2) Lands Department
- 3) Daycare
- 4) Health and Social
- 5) Main Administration building
- 6) Duplex near Lands
- 7) Three-plex near Lands
- 8) TTHS house #3
- 9) TTHS house #5
- 10) TTHS house #7

*Mike Jules, Riel Sidney, Richard Grant, William Sidney and Nathan Bob have done a marvelous job building the new Biomass chip storage sheds. These buildings will house the chips of wood that will burn in the biomass burners being set up in Teslin. Thanks to project manager Pete Steiner and foreman Richard Grant for all your hard work.*

## What is Biomass?

Biomass is fuel that is developed from organic materials, a renewable and sustainable source of energy used to create heat or power.

## How is it turned into Energy?

Burning stuff like wood, waste and other plant matter releases stored chemical energy in the form of heat. The energy from these organisms can be burned to create heat or converted into electricity.

Fuel wood harvested in the Teslin area will be chipped and stored in the chip storage building, and when sufficiently dry, will be transported and burned in the chip boilers located in the community.

## What are the benefits?

- > Renewable: when converting this year's crop to fuel, you are growing another one for next year's fuel.
- > Carbon neutral: Biomass is a part of the carbon cycle. Carbon is absorbed into plants, and when the plant decays or burns, that carbon goes back into the earth. The next crop of plants absorb that carbon over again.
- > Cost-effective: They cost about 1/3 less than fossil fuels doing the same thing. Which means you spend 1/3 less every year on heat.
- > Abundant: Available in large quantities all over the globe.
- > Prevents Forest Fires: Harvesting trees from forests can help to prevent fire breakouts as a result of dense growth.

## Lands & Resources

In May, the Lands and Resources Department welcomed our new director, Emmie Fairclough. Emmie brings a wealth of knowledge and experience to our team from her previous work, including her time in this office as TTC's Renewable Resources Manager and Fish and Wildlife Officer. She is very much looking forward to serving her fellow TTC Citizens through the important initiatives of our Department, like enabling local land use planning, promoting TTC's salmon management goals, and empowering Citizens through clan-based councils and boards.

We would also like to recognize Tom Cove, our previous director. His efforts over the course of his four year term have helped TTC make great strides in a number of important files and his tireless work for the Lands and Resources Department is greatly appreciated.

### Lake Trout

TTC continues to work to protect Citizens' rights to harvest under the Final Agreement, including the right to harvest trout for subsistence throughout the Traditional Territory. In order for TTC to protect these rights and support the best management of Teslin Lake's trout population, we need to have the best possible information about the history of the population, the health of the fish, changes in where the fish are found, and the harvest pressure on the population. While Yukon Government conducts a creel survey for all people fishing on Teslin Lake every 5-7 years, it is important that TTC work with its own Citizens on a more regular basis to better understand how they depend on the trout population and how that may have changed. Teslin Tlingit Council would like to know more about trout in Teslin Lake. We are hoping to speak with Citizens about what they've caught, seen, eaten, or experienced in recent years, but also about any changes Citizens have noticed over many years. Please watch for our upcoming survey at the boat launches this summer!

### Settlement Land Lot Surveys

This summer, Lands staff will be continuing our work to get Citizens' lots on Settlement Land surveyed. This is important for Citizens, as it helps to protect their interests and is a key part of home ownership and mortgaging. Please don't hesitate to chat with our staff if you have any questions about this process.

### Salmon Season

Lands staff are working with Executive on pre-season planning for the salmon season, and have been attending a number of management meetings over the last month. The 2016 salmon resolution remains in effect this year; as such, TTC remains committed to a full conservation closure of Chinook salmon fishing outside of the communal camps authorized by General Council. Run updates, the status of communal fish camps, and other management information will be shared in-season via email, posters, and on the website.

TTC will be hosting a Citizens meeting to share information on 2017 run estimates, management approaches, and restoration and monitoring work being undertaken in the traditional territory. We expect that this meeting will take place sometime in mid-June, so watch for advertisements!

More information on the Taku salmon program will be shared as it becomes available.

### Game Guardian Update and Boat Safety

There is a lot of boat activity on the lake now – please make sure your boat is fully outfitted for an emergency situation, including packing extra rope, a flashlight, flares or air horn, and extra food and water. Always wear your life jacket!

With activity on the land increasing over the summer, we rely on Citizens being the eyes and ears out on the land. If you see anything suspicious, or have a concern about wildlife or land users, please contact us as soon as possible. Your observations are always appreciated!

### Grizzly Bear Management Planning

TTC has been engaging with Yukon Government and the Yukon Fish and Wildlife Management Board as they begin the process of creating a management plan for grizzly bears all across the Yukon. While there was a public survey sent out by Yukon Government to all Yukoners, we would like to know what Citizens think about grizzly bears! We will be doing a TTC Citizen survey over the next couple of weeks, going door to door. Of course, you can always stop by our office to complete the survey, too, if you want to have your say. Participants will have their names entered in a prize draw, too!

As always, your participation is a very important part of the work our Department does each day, so thank you in advance!

### Construction Season

Construction season is now in full swing! It's great to see so many Citizens busy with development and building projects, both commercial and personal. If you are planning a project on Settlement Land, please stop by the Lands office to discuss any necessary permits that may be required. We are here to help with applications!

### BC treaty negotiations

In February 2017, General Council authorized Executive Council to re-engage on treaty negotiations with BC. EC was directed to establish a negotiation process based on a mandate that included addressing reserves 7, 8 and 9 in BC, working with neighboring First Nations, protecting TTC interests while negotiations were underway and negotiating an agreement that is consistent with common law and mirrors TTC rights established under the Umbrella Final Agreement in the Yukon.

Dave Keenan is TTC's Negotiator, with assistance from Wilbur Smarch. A budget and work plan were presented at the February GC meeting. The goal is to have a final draft mandate to present to General Council at the July 2017 AGA. The negotiation team has been busy reviewing

past negotiations, gathering information and developing a recommended approach for TTC in this new round of talks. There have been several meetings with Elder's Council and with Carcross/Tagish First Nation. More meetings will be planned with TTC's Executive Council, Management Board, Elder's Council and Youth Council as well as with CTFN and TRT.

There are also 2 public open houses planned in Teslin for June 5th and June 12th at the Longhouse. Other meetings for Citizens in Whitehorse will be planned. Drop in to learn more about the background and progress made so far on a BC treaty. We will have maps to show you and will be asking for your main concerns about your values and interests in BC. Looking forward to seeing you there.

## Youth Council Update

November 2016, Teslin Tlingit Council hired Mary Bob as the Executive Youth Representative (EYR). Youth Council was established at the February 2017 General Council. The focus is for Teslin Tlingit youth to provide invaluable perspective on global, national, territorial and local experience that are important to the development and application of Teslin Tlingit social, cultural, political and economic policies. Youth Council is to acquire the necessary knowledge and develop the leadership skills to eventually assume the position at the General Council, Executive Council and Elders Council.

Youth Council is composed of five members, one representative from each clan and an alternate. Selected youth members are; Christopher Fairclough - Kùkhittàn; Leslie McMillan and alternate Jacob Jackson - Ishkitàn; Mike Sydney - Yanyèdí; Daniel Hager and alternate Travis Wolfe -

Dèshitàn and Billy Smarch - Dakh'awèdí. Youth Council is now the sixth branch of government and composed of Teslin Tlingit citizens ages 14 -29.

The Council have had four meetings to establish the Terms of Procedure and amend the Constitution. Youth Council has meet with Melanie Douville and Victoria Fred to assist with required amendments and creation of the two documents, from the November 2016 Resolution. This is all quite new and a great learning experience to the Council. Youth from the community have been attending in small numbers and have ideas on programming, conferences, what they would like to see and expect. Traveling, summer culture camp, traditional learning and additional programming for older youth is their number one interest, so far.

All youth ages 14-29 years, are welcome to attend the Youth Council meetings, their

input is valuable, they have unique ideas and most of all laughter is in every meeting. Meetings are held the first Wednesday of every month in the Executive Board Room located in the main Administration Building starting at 4:00 p.m. For youth who are in Whitehorse, they can attend meetings at the Teslin Tlingit Council Office across from Yukon Inn via Video Link.

If you require further information, questions, or a ride, you can contact Mary Bob Executive Youth Rep. at 1-867-390-2532 Ext 401, personal cell 778-887-8352 or [mary.bob@ttc-teslin.com](mailto:mary.bob@ttc-teslin.com)

## February 16th, 2017 – Public Engagement Session

Stantec helped the Village of Teslin (VoT) and Teslin Tlingit Council (TTC) facilitate a Public Engagement Session on February 16th, 2017. There were approximately 50 attendees. The three main projects discussed during the session included: Connector Road, Central Biomass System and Ditching and Drainage Program. Public engagement is an important part of ongoing community involvement and making the projects better that were identified in the Community Development Plan. A World Café exercise was used to gather and provide information on each project. During the World Café, the community members gathered in small groups to address concerns, opportunities, what is needed to make a great project, and project involvement. There was a table for each project with an additional table for TTC Heritage.

Some key takeaways from the engagement session included:

- On-going communication (through email/newsletters)
- Local employment opportunities
- Concerns about wildlife/wetland habitat loss
- Supply chain for biomass system (supply chain workshop)
- Need for Heritage Resource Assessment

## April 5th, 2017 – Community Dinner

Annually, the Village of Teslin (VoT) and Teslin Tlingit Council (TTC) host a community dinner to share the progress on the Community Development Plan and discuss prioritization of future projects. Approximately 160 community members attended the dinner to partake in the ongoing community engagement to ensure success in the implementation of the Plan. Stantec aided by facilitating a project ranking exercise (“dotmocracy”) where community members were asked to prioritize and provide comments on the current 10-Year Capital Plan (2017-2027).

1. New School (includes pool) (TTC)
2. Trail development (VoT)
3. Breakwater at marine / secure dock (VoT)
4. Recreation building upgrades (VoT)
5. Citizen housing (TTC)
6. Street lights from bridge to fox point subdivision (Joint)
7. Nisutlin Bay Bridge upgrades (Joint)
8. Recreation equipment (VoT)
9. Trail development (Joint)
10. Community garden & year round greenhouse (Joint; VoT)

There was a blank section where community members could provide additional feedback and suggest new project. The additional projects included:

- Waterfront walkway from Nisutlin bay bridge to Heritage Centre
- Showcase Tlingit people and culture with a camp filled with people dressed in traditional regalia
- Develop remote trail to Juneau and Atlin
- Johnston Town Tlingit National Heritage Park and campground
- Tlingit Arts and Beautification, totem poles, etc (like Carcross)
- Develop remote campsite around Teslin Lake, Quiet Lake, Wolf Lake
- Speed bumps
- Future graveyard
- Use restored heritage trail, heritage houses for commercial outlets, coffee shops
- Public drinking establishment

ARE YOU INTERESTED IN VIDEO PRODUCTION?  
TTC is offering a training opportunity in video production. The chosen TTC Citizen will get on the job training as a Production/Camera Assistant. You will work closely with the production crew; learn how to operate camera and sound equipment, creative shooting skills and general production assistant responsibilities. Please send a letter of interest with your contact information to:  
TTC Communications Unit  
Communications@ttc-teslin.com

*The community members participating in the Dotmocracy Priority Ranking Exercise. There was large sheet with each project on it for each project owner (VoT, TTC, and Joint VoT and TTC). Participants prioritized their top four projects under each project owner.*

*Each participant was given four dots for each project owner. The dots were placed under projects that they thought were of highest priority.*

*TTC's new Elders/ Youth transportation! Bob Magill with Salesman.*

Teslin Tlingit Council's new Shuttle bus arrived recently, pictured above.

With the collaboration and support from Governments of Canada and Yukon TTC was able to purchase the new bus through the Federal Gas Tax Fund.

Another way that working together benefits everyone

The new 28 seat passenger bus has an accessibility ramp, which can accommodate two wheelchairs and will replace the current aging bus.

Citizens, in particular elders and youth, will enjoy an upgraded ride to activities, events, and various functions in Teslin and other communities.

## ***Congratulations Graduates!***

## Teslin School - All the Best Grade 9's !

## Painting with Jean Taylor

Thank you to Jean for teaching us how to put paint from brush to canvas. Students spent 4 days painting scenes of landscape and wildlife. Here are some of the student's projects. Jean will be back this fall to host another session, watch for posters with dates and location of the next course.

## Haa Kusteeyi Information

### Share in our Tlingit Culture

The 2017 Haa Kusteeyí Celebration will take place from Thursday, July 27 to Sunday, July 30 in Teslin, Yukon Territory, Canada at the Teslin Tlingit Heritage Centre. Starting on Thursday, July 27 will be a traditional lake crossing and arrival in a Tlingit canoe, followed by a greeting ceremony and the lighting of the Celebration Fire. The Official Welcoming and Grand Entrance Parade with pageantry, flags and Tlingit regalia will follow in the late afternoon. Scheduled daily are: Public Art Workshops,

Cultural Demonstrations, Storytelling, Canoe Rides, First Nation and Contemporary Performers, Artists' Market, Kids Zone, Hand Games Demonstrations, Tlingit Language Lessons and much, much more! Each evening will begin with a Public Feast followed by Cultural Performances. ALL are welcome to attend and there is no charge for admission.

### 2017 Haa Kusteeyí Celebration Program

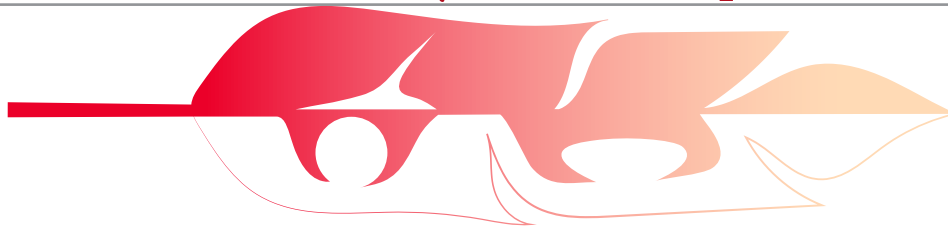

COMING SOON!

- Nightly Feasts
- Traditional Performances
- Cultural Demonstrations
- Artists Market
- Kids Zone
- Canoe Events
- Tlingit Language Lessons
- Contemporary Performances
- Fashion Show & Tell
- Artist Talks
- Play Reading
- Soap Berry Making Contest
- and much, much more!

# RANSOMWARE BULLETIN

## Recognize, Reject and Report it!

The incidents of ransomware in Canada are rising at an alarming rate. In 2015, Canadians were affected by **1,600 ransomware attacks a day**.<sup>1</sup> By September 2016, the attacks nearly doubled. Those are the known cases. Unfortunately, many incidents still go unreported.

Bulletin 1, Version 1.0  
May 2017

### RECOGNIZE IT!

#### What is Ransomware?

It is malicious software also known as malware, which infects a computer and denies access to the system or data, and demands a sum of money to restore the information. At present, the most common form of ransomware will encrypt data. Victims will receive an on-screen alert stating their files have been encrypted or a similar message, depending on the type of ransomware. Here is an actual example: →

### PERSONAL COMPUTER USER

#### REJECT IT!

##### How can I protect myself?

- Do not click on links or open attachments in e-mails sent to you by someone you do not know.
- Do not provide personal information over the phone or online to untrusted sources.
- Install only trusted software.
- Back up your system/data regularly and keep the backups on a separate removable hard drive. Don't forget to disconnect when done. If possible, check the backup(s) from a separate computer that uses a different operating system.
- Install a reputable security software suite on all devices, including personal computers, mobile phones and tablets.
- Secure your wireless router.<sup>2,3</sup>
- Disable file sharing and remote desktop.
- Make sure all your software, including anti-virus software is up to date on all your devices including personal computer, mobile phones and tablets.

1 - <https://www.getcyberSAFE.gc.ca/cnl/016/pst-20161205-en.aspx> accessed on February 20, 2017.  
2 - <https://www.getcyberSAFE.gc.ca/cnl/prict-dvcs-fm-nwtrks-en.aspx> "Securing your home wireless network" accessed on April 04, 2017.  
3 - <https://www.us-cert.gov/ncsc/st15-002> DHS Tips (ST15-002) - "Securing Your Home Network" accessed on April 04, 2017.  
4 - [https://www.usd.gov.au/publications/protects/application\\_whitelisting.htm](https://www.usd.gov.au/publications/protects/application_whitelisting.htm) accessed on April 04, 2017.

### BUSINESS COMPUTER USER

#### REJECT IT!

##### How can I protect my business?

- Train and educate staff on good security practices.
- Do not click on links or open attachments in e-mails sent to you by someone you do not know.
- Use a reputable security software suite.
- Restrict administrative privileges.
- Back up your system/data regularly to a cloud or removable media such as an external hard drive not constantly connected to the server. If possible, check the backup (s) from a separate computer that uses a different operating system.
- Use application whitelisting to help prevent malicious software and unapproved programs from running.<sup>4</sup>
- Make sure all software, including anti-virus software, is up to date on all computers, servers and devices including mobile phones and tablets.
- Develop a business continuity plan and incident response plan.

## RANSOMWARE BULLETIN

### PERSONAL COMPUTER USER

#### REPORT IT!

##### How should I respond?

If you become a victim, do not panic. Do not do anything further on your computer. Contact a trusted IT professional who can try to isolate the threat.

Report the incident to your local police force or jurisdiction. Please remember that every report counts and is a valuable tool for investigations.

Please also contact the Canadian Anti-Fraud Centre (CAFC) by reporting the incident online 24/7 at: [www.antifraudcentre-centreantifraude.ca](http://www.antifraudcentre-centreantifraude.ca), select "Report an Incident", and the link to the "Fraud Reporting System (FRS)"; or alternatively call the CAFC at 1-888-495-8501, between 8:30 am and 5 pm EST Monday to Friday.

Additional help may be found on the "No More Ransom" website at: <http://www.nomoreransom.org>. The site is a tool to help victims retrieve their data, and was developed by law enforcement and IT security companies globally.

### BUSINESS COMPUTER USER

#### REPORT IT!

##### How should my business respond?

Do not do anything further on your computer. If available, consult your local IT department or an IT professional for assistance.

Critical infrastructure, business and provincial/territorial/municipal governments should immediately report the incident to the Canadian Cyber Incident Response Centre (CCIRC) via e-mail at: [ccirc@ccirc.gc.ca](mailto:ccirc@ccirc.gc.ca), or visit <https://www.publicaffairs.gc.ca/en/infocentre-ccirc/ccirc-en.aspx> for more information. CCIRC will assist in mitigation and prevention.

You are encouraged to open a criminal investigation into the matter by reporting the incident to your local police force of jurisdiction and informing CCIRC you have done so. Please remember that every report counts and is a valuable tool for investigations.

You may also contact the Canadian Anti-Fraud Centre (CAFC) by reporting the incident online 24/7 at: [www.antifraudcentre-centreantifraude.ca](http://www.antifraudcentre-centreantifraude.ca), select "Report an Incident", and the link to the "Fraud Reporting System (FRS)"; or alternatively call the CAFC at 1-888-495-8501, between 8:30 am and 5 pm EST Monday to Friday.

We strongly suggest that you **DO NOT PAY THE RANSOM** for the following reasons:

- It does not guarantee that your data will be restored.
- It may encourage the ransomware operator to continue to target you.
- It may encourage the ransomware operator to target other businesses.
- It may encourage the ransomware operator to target other individuals.

We encourage you to report the incident to your local police force or jurisdiction and to the Canadian Anti-Fraud Centre (CAFC) at 1-888-495-8501, between 8:30 am and 5 pm EST Monday to Friday.

## Teslin Lake Trout Spawning Site Investigation and Mixed Stock Genetics

Adult lake trout

Lake trout fry

If you catch a tagged lake trout, please keep or release the fish as if it were not tagged and record the date, location, tag color and number and whether the fish was kept or released. You can report the tag to one of the following:

- Call the phone number on the tag EDI 867-393-4882
- Call the Teslin RRC (867-390-2323)
- Call the Teslin Tlingit Council Lands Department, Gillian Rourke: (867-390-2532)
- On Facebook via the page: "Teslin Lake Trout Research Project"

In addition to reporting tags, anglers and subsistence fishers can provide lake trout genetic samples to be used by the project.

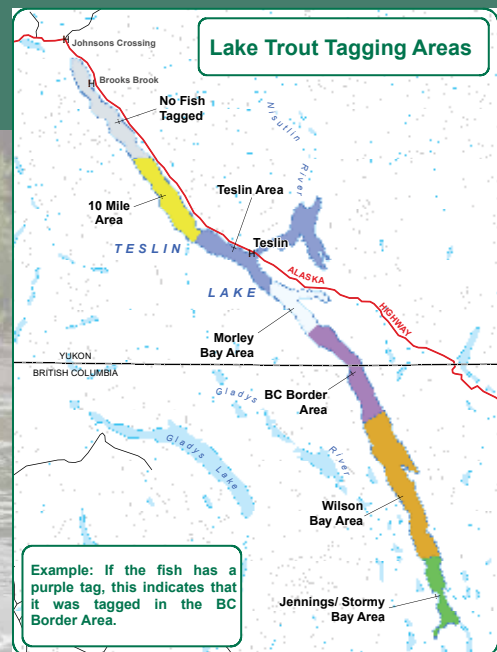

To pick-up sampling supplies, call one of the phone numbers above or pick them up from the Nisutlin Trading Post or at the sample boxes located at the boat launch in Teslin or the 10 Mile Boat Launch. Increasing the number of samples from harvested lake trout is extremely important for this project to proceed. Everyone who provides samples or reports tags will be entered in a draw for prizes in November 2017 (last year's prizes included a generator, chainsaw, etc).

Tagging lake trout spawner (10 Mile Area)

BC Border Area tag

Example: If the fish has a purple tag, this indicates that it was tagged in the BC Border Area.

The Teslin RRC is in year two of a lake trout research project on Teslin Lake. The goal of the project is to better understand lake trout in the lake. During 2017, fisheries biologists will be doing more fish sampling on the lake to learn about where the lake trout spawn and how they move in the lake.

During 2016, over 300 lake trout were tagged with brightly colored tags in hopes of being captured by anglers to learn about their movements. Different colored tags were applied to spawning lake trout in different areas of the lake.

## ELDERS SHOPPING DAYS 2017

June 28, (Wednesday)

July 27, (Thursday)

August 29, (Tuesday)

September 27, (Wednesday)
