

## Joint Advisory on COVID-19 Outbreak

August 4<sup>th</sup>, 2021

### Lifting of Restrictions

On August 4<sup>th</sup>, the Yukon Government lifted several COVID-19 restrictions, and we are entering a new phase of the pandemic. While many will embrace these changes, others in our community are anxious about them. **This phase emphasizes strong individual awareness of your behaviour and the wishes of others, and we ask that you remain respectful of the wishes of other community members and our local businesses.**

Although Teslin has no active cases, COVID-19 is still in the Yukon and may return to Teslin. We are also asking all residents to continue to practice the **Safe Six plus One**. Unorganized gatherings, including parties, continue to be a source of community spread in the Yukon, and we ask that you conduct yourself wisely in these situations.

When travelling, please respect the wishes of other communities. Although we currently do not have cases in Teslin, other communities are not so lucky. We ask that all residents and visitors to Teslin and the TTC Traditional Territory behave with the utmost safety and respect.

Vaccines are the most critical tool to keep ourselves and our community safe. If you can get the vaccine, please seriously consider getting it. If you are not vaccinated, it is important to keep your personal bubble very small, wear a mask, wash your hands and safe distance. Dr. Hanley recommends you "Stick to Six" or less. As he stated, "If you're unvaccinated, this virus will find you." **Keep practicing the Safe Six plus One.**

Tesliners have done an incredible job throughout the pandemic, and we hope to return to normal soon by continuing to do so. As usual, we look after and support each other through the clan system, family, and friends. Help others understand the consequences of their actions. **Above all, be careful, respectful, and kind to one another.**

Sincerely,  
TESLIN TLINGIT COUNCIL

Eric Morris
